Nfl sunday ticket roku app

Last night, Roku made a surprise announcement that it dropped all Fox apps from its platform, claiming the two-company distribution agreement had expired. The announcement seemed to affect Roku's ability to stream super Bowl without having to pay for expensive live TV services such as YouTube TV, Hulu with LIVE TV, Fubo TV, or AT&T TV Now. (Fox, in a statement, has accused Roku of naked efforts to use his client as a pawn in a significant transport dispute.) Fortunately, there are workarounds that don't involve buying new streaming devices or using an antenna: just installing the NFL roku app to watch the game instead. NFL spokesman Alex Riethmiller confirmed to Fast Company that the NFL app would continue streaming the game as planned. The only downside is that the NFL app won't stream games in 4K HDR resolution. For that, you need to use the Fox Sports app on a 4K HDR compatible Fire TV device from Amazon, such as Fire TV Stick 4K or Fire TV Cube. Apple TV 4K will also have games in 4K via the Fox app, but without HDR support. Of course, Roku and Fox could still come to an agreement before the Super Bowl starts, but it's good to know Roku users will have a backup plan either way.
